# All About Us, and CSA.

Computer Science Association, Engineering Society, HKU (CSA, ENS, HKU) is a departmental student body established in 1995, and was well recognized as the 3C Committee, The University of Hong Kong. The name was changed to Computer Science Association, The University of Hong Kong in 2004 to gain more recognition from the public and maintain better operation. The association changed to the present name in 2021.

The prime goal of CSA, ENS, HKUSU is to serve all members, not solely to preserve, but to seek and improve their rights, as well as general welfare. Besides, we enhance the friendship and communication among members and serve as a communication channel between students and Department of Computer Science, external organizations and the general public.

# Farewell Message

Celeritas is a group of students who want to build a community amongst Computer Science students at the University of Hong Kong. With this goal in mind, a new committee for the Computer Science Association was formed.

Though we had many ideas, preparations were needed as the association had been left unregulated for years.

Throughout our session, we dealt with a lot of administrative tasks, which includes reconnecting with the department and the past committee, registering the association with the Co- Curricular

Support Office, changing the constitution due to the addition and removal of various programs and much more. At the same time, we still hoped to organise events that benefits our members with opportunities to meet each other given that for the past few years, lessons were conducted online.

It is fair to say that not many events were organised due to the amount of internal work we had to handle, but with all obstacles being dealt with, we have high hopes for the nominated committee, Meliora.

# CELERITAS

2021 TO 2023

Starting with C. Ending with S.

Celeritas, we acts with quickness  
and swiftness.
