2

Enterprise Applications

- ◆ Software application hosted on a server that simultaneously provides services to a *large number of users*, typically *over a computer network*
- ◆ Different from software application that run on *local computer*, serving *one user at a time* .

3

Enterprise Application Example

Digital Trade and Transportation Network

- ◆ E-platform for logistics and shipment
- ◆ *One stop* for supply-chain management .

4

DTTN Logistics Service Providers

5

DTTN Shippers

6

DTTN Connected Shipment Carriers

7

DTTN Connected Airlines

8

Enterprise Applications

Challenges in Analysis and Design

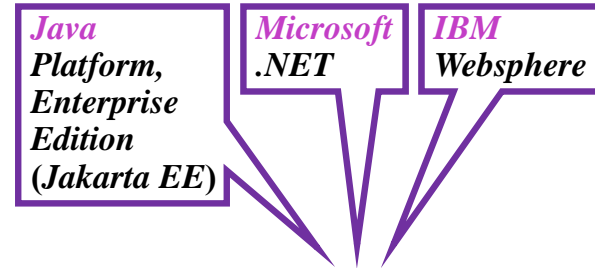

- ◆ Too many *user scenarios* and *use cases*
- ◆ Too many *design* considerations

Enterprise Applications

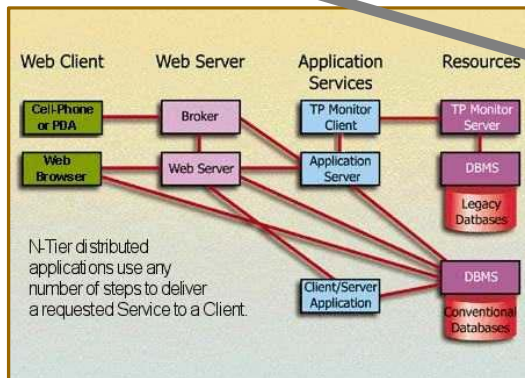

Challenges in Analysis and Design

- ◆ Too many device-dependent *implementation* platforms

Common Design in Enterprise Applications

Multi-Tier Distributed Architecture

- ◆ *Extended concept of boundary, control, and entity classes*
- ◆ *More easily said than done!* 😞
