

# Modern Web Design

Prof. T.H. Tse

Department of Computer Science

Email: [thtse@cs.hku.hk](mailto:thtse@cs.hku.hk)

Web: [hku.hk/thtse](http://hku.hk/thtse)

- ◆ *Important part of the course*
- ◆ *Systems design is more than UML diagrams*

## Motivation

- ◆ Front-end *holistic* design of an *enterprise system* for an organization is important for corporate image
- ◆ Front-end *single-user* design of *individual apps* for is also important for brand building
- ◆ Modern web design provides *simple techniques* for new designers

2

## Acknowledgements

Some of the slides are based on the real-life knowledge exchange project funded by

- ◆  Research Grants Council
- ◆  Equal Opportunities Commission

3

## Presentation Outline

- ◆ Learn from other specialties
- ◆ Elements of modern web design
- ◆ Conclusion

4

## Presentation Outline

- ◆ *Learn from other specialties*
- ◆ Elements of modern web design
- ◆ Conclusion .

5

## Traditional Design

- ◆ *Ornamentalism.* Excessive ornaments

Antonio Morandi  
*Palazzo Archiginnasio*  
**(1563)**  
Bologna, Italy .

6

## Modern Design

- ◆ *Minimalism.* Remove everything that distracts us

Piet Mondrian  
*Composition II*  
*with Red, Blue,*  
*and Yellow (1930)*

Modern 現代 ≠  
contemporary 當代 ...

## Modern Design

- ◆ *Minimalism (Continued)*

*Still fashionable .*

## Traditional Design

### ◆ Ornamental Furniture

White Drawing Room  
Buckingham Palace .

## Modern Design

### ◆ Minimalist Furniture

- Affordable, functional, and elegant

Edward Wormley  
Dunbar Modernist  
Sofa (1950)

Modern 現代 ≠  
contemporary  
當代 ...

## Modern Design

### ◆ Minimalist Furniture (Continued)

Still fashionable .

## Presentation Outline

- ◆ Learn from other specialties
- ◆ *Elements of modern web design*
- ◆ Conclusion .

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ Wireframe design
- ◆ Banner design
- ◆ Grid-based design
- ◆ Long scrolling or multiple web pages?
- ◆ Responsive web design
- ◆ Accessible web design
- ◆ Implementation without coding
- ◆ Search engine optimization .

13

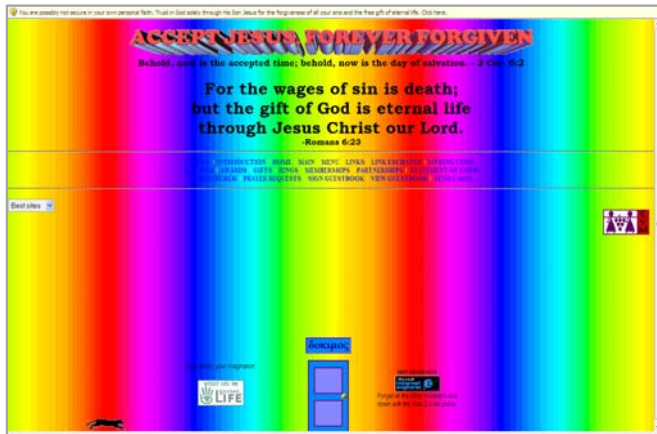

## Elements of Modern Web Design

- ◆ **Modern web layout design**
- ◆ Wireframe design
- ◆ Banner design
- ◆ Grid-based design
- ◆ Long scrolling or multiple web pages?
- ◆ Responsive web design
- ◆ Accessible web design
- ◆ Implementation without coding
- ◆ Search engine optimization .

14

### *Traditional Layout Designs Need Extensive Training* **Motivating Example 1**

15

### *Traditional Layout Designs Need Extensive Training* **Motivating Example 2**

16

## Modern Web Layout Design

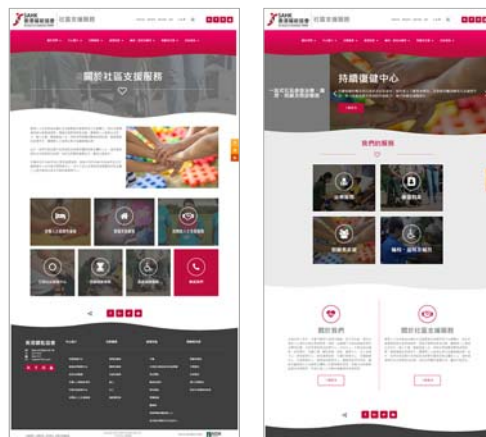

- ◆ **Reject** ornamentalism
- ◆ **Embrace** minimalism
- ◆ **Simplicity** with clean lines and neutral colours
- ◆ Form should follow **function** .

17

## Modern Web Layout Design

## Modern Web Layout Design

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ **Wireframe design**
- ◆ Banner design
- ◆ Grid-based design
- ◆ Long scrolling or multiple web pages?
- ◆ Responsive web design
- ◆ Accessible web design
- ◆ Implementation without coding
- ◆ Search engine optimization .

20

## Modern Web Layout Design

### Wireframe Design

- ◆ Useful in early design process
- ◆ Establish basic layout structure of web pages before detailed design and contents .

21

## Modern Web Layout Design

### Wireframe Design

22

## Web Layout Design

### We Learn from Mistakes

Modern  
Web Design

Prof. T.H. Tse  
Honorary Professor  
Department of Computer Science  
The University of Hong Kong  
Email: thtse@cs.hku.hk

Meaningful words  
may be distracting .

23

## Modern Web Layout Design

### Wireframe Design

Lorem Ipsum  
Dolor

Sit Amet  
Consectetur Adipiscing Elit  
Sed do Eiusmod Tempor  
Incididunt ut Labore et Dolore  
Magna Aliqua

◆ Latin text without  
meaning  
◆ Demonstrate visual  
format only .

24

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ Wireframe design
- ◆ **Banner design**
- ◆ Grid-based design
- ◆ Long scrolling or multiple web pages?
- ◆ Responsive web design
- ◆ Accessible web design
- ◆ Implementation without coding
- ◆ Search engine optimization .

25

## Banner Design Pictorial Movement

- ◆ Pictorial movement from the *left toward the right* seems to require less effort ...
- ◆ An animal speeding from *right to left*, for example, seems to be overcoming more resistance .

A. Arntson  
*Graphic Design Basics*

26

## Banner Design Pictorial Movement

**Lorem Ipsum**  
Dolor sit amet sea cu molestie invenire

**Lorem Ipsum**  
Dolor sit amet sea cu molestie invenire

27

## Banner Design We Learn from Mistakes

**Lorem Ipsum**  
Dolor sit amet sea cu molestie invenire

**Lorem Ipsum**  
Dolor sit amet sea cu molestie invenire

28

## Acceptable *Only for Emphasizing Difficulties*

# Many Obstacles Ahead

# Many Obstacles Ahead

29

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ Wireframe design
- ◆ Banner design
- ◆ **Grid-based design**
- ◆ Long scrolling or multiple web pages?
- ◆ Responsive web design
- ◆ Accessible web design
- ◆ Implementation without coding
- ◆ Search engine optimization .

30

## We Learn from Mistakes

31

## We Learn from Mistakes

- ◆ Popular in the **1920s**
- ◆ But that was >100 years ago

Let us learn from Piet Mondrian .

## Modern Web Layout Design

### Grid-Based Design

#### Grid

- ◆ 2-D structure made up of a series of intersecting vertical and horizontal lines (*grid lines*)
- ◆ Serves as framework for organizing graphic elements .

33

## Grid-Based Design

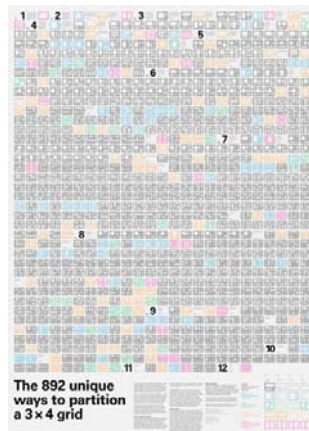

- ◆ Will it be boring?
- ◆ How many ways to partition a 3 x 4 grid?

34

## Grid-Based Design

- ◆ 892 unique ways to partition a 3 x 4 grid!

35

## Grid-Based Design

36

## Grid-Based Web Layout Design

## Long Scrolling or Multiple Web Pages?

### *Long Scrolling*

- ◆ New trend due to mobile phones
- ◆ They do not support multiple windows .

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ Wireframe design
- ◆ Banner design
- ◆ Grid-based design
- ◆ *Long scrolling or multiple web pages?*
- ◆ Responsive web design
- ◆ Accessible web design
- ◆ Implementation without coding
- ◆ Search engine optimization .

## Long Scrolling or Multiple Web Pages?

### *Considerations*

- ◆ How much content on main page?
- ◆ Enough content to justify splitting?
- ◆ Do supporting pages have enough content to be stand alone?
- ◆ Easier for users to find content if it is spread across numerous pages? .

## Long Scrolling or Multiple Web Pages?

### Recommendations

- ◆ Strike a balance
- ◆ Use accordions

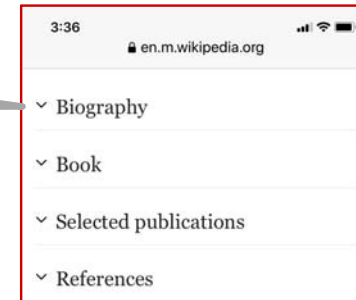

41

## Long Scrolling or Multiple Web Pages?

### Recommendations

- ◆ Strike a balance
- ◆ Use accordions

*Click to expand*

## Long Scrolling or Multiple Web Pages?

### Recommendations

- ◆ Strike a balance
- ◆ Use accordions

*Click to collapse*

## Long Scrolling or Multiple Web Pages?

### Recommendations

- ◆ Strike a balance
- ◆ Use accordions

## Long Scrolling or Multiple Web Pages?

### *Recommendations*

- ◆ Strike a balance
- ◆ Use accordions
- ◆ Responsive web design .

45

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ Wireframe design
- ◆ Banner design
- ◆ Grid-based design
- ◆ Long scrolling or multiple web pages?
- ◆ **Responsive web design**
- ◆ Accessible web design
- ◆ Implementation without coding
- ◆ Search engine optimization.

46

## Responsive Web Design

### *Responds properly to*

- ◆ Different devices
  - Desktop computers, laptop computers, tablets, smart phones
- ◆ Different screen sizes .

47

### *We Learn from Mistakes*

## Traditional Web Design

### *Desktop Version*

### *Mobile Phone Version*

*Tiny fonts*

*Complete waste of resources .*

48

## Responsive Web Design

## Responsive Web Design

50

## Responsive Web Design

### *Responds properly to*

- ◆ Different devices
  - Desktop computers, laptop computers, tablets, smart phones
- ◆ Different screen sizes
- ◆ Different orientations
  - Portrait and landscape modes .

51

## Responsive Web Design

52

## Responsive + Wireframe Design

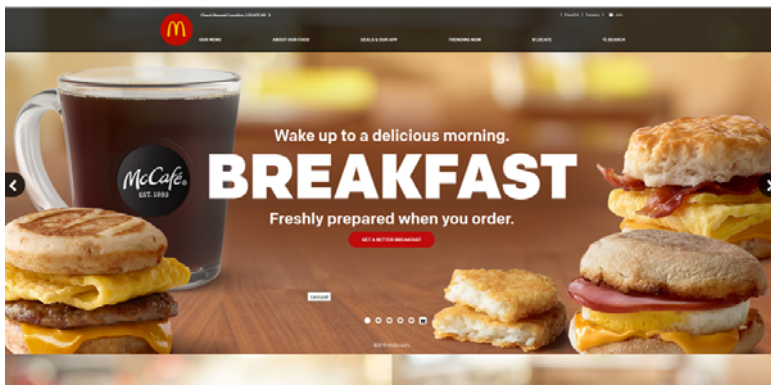

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ Wireframe design
- ◆ Banner design
- ◆ Grid-based design
- ◆ Long scrolling or multiple web pages?
- ◆ Responsive web design
- ◆ **Accessible web design**
- ◆ Implementation without coding
- ◆ Search engine optimization .

54

## We Learn from Mistakes Inaccessible Website

## We Learn from Mistakes Inaccessible Website

As "seen" by people with visual impairment .

## Accessible Web Design

- ◆ Plain text version?
  - ☹ Duplication of effort
- ◆ Learn more from other specialties .

57

## Learn More from Other Specialties Accessible Route

- ◆ Ramp
  - ◆ Universal design
- Special route  
Full integration

- ◆ Universal design is a law in the mainland on 1 September 2023
- ◆ HKSAR still needs to learn .

## Learn More from Other Specialties Accessible Transport

- ◆ Rehabus
  - ◆ Accessible mass transit
- Special transport  
Full integration

## Accessible Web Design

- ◆ All the words are rendered as styled text
- ◆ Full integration .

## Why Do We Need Web Accessibility?

### Screen Reader

- ◆ Application software that converts *standard text* output into *voice or Braille*
  - Does not not really “read” the “screen”
- ◆ Used by
  - People with visual impairment (including total blindness)
  - People with learning difficulties
  - People who are illiterate .

61

## Why Do We Need Web Accessibility?

- ◆ For people with visual impairment (including total blindness)

### Social responsibility?

- ◆ *Social asset!*
- ◆ *Financial asset!*

INVESTMENT BANKING  
**Managing Risk for JPMorgan, and Blindness**  
By JULIA WERENGER | OCTOBER 2, 2010 7:24 PM | 44 Comments

Andrew Tetta for The New York Times  
Ashish Goyal at JPMorgan Chase in London. His computers can read information to him rapidly through a headset.

LONDON — As a trader at JPMorganChase in London, Ashish Goyal helps manage billions of dollars of the bank's exposure to risks like foreign exchange fluctuations. In his spare time, he takes tango lessons, plays cricket and goes clubbing with friends. Mr. Goyal is also blind.

## Why Do We Need Web Accessibility? Continued

- ◆ For people who use slow modems
  - We need credit cards to apply for broadband
  - People in poverty do not have credit cards
  - They turn off the images

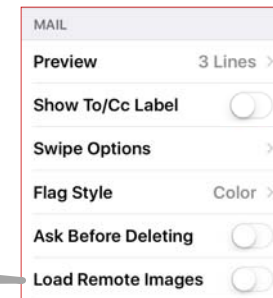

### Social responsibility?

*Social asset!*

63

## Why Do We Need Web Accessibility? Continued

- ◆ For people using portable devices, who may turn off images to reduce security risk or cellular data charge

*Financial asset!*

64

## We Learn from Mistakes

*Who will load the image if they have no idea of the message content? .*

65

## Simple Test of Web Accessibility

- ◆ *Turn off “Show pictures”* in web browser
- ◆ Open the web page .

66

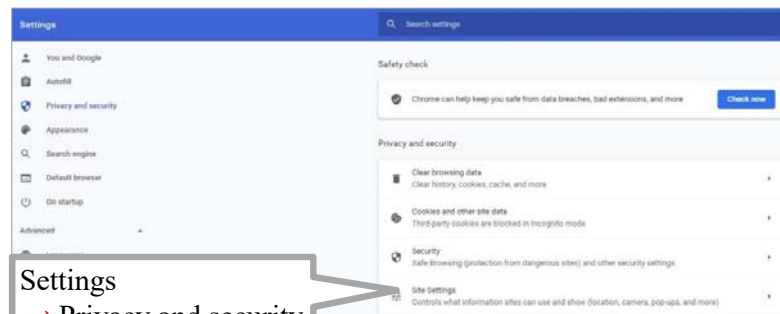

## Turn off “Show Pictures” Microsoft Edge

Settings  
→ Cookies and site permissions  
→ Turn off “Show all” .

67

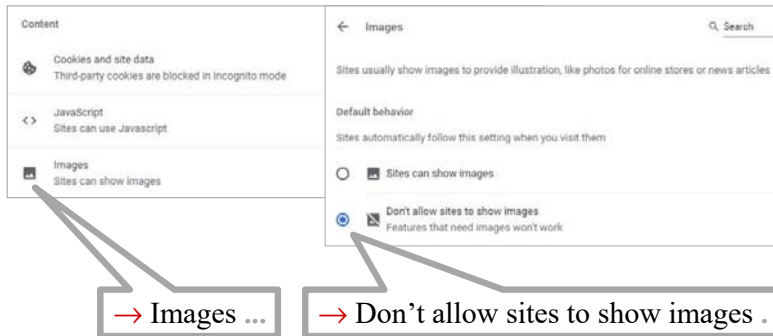

## Turn off “Show Pictures” Google Chrome

Settings  
→ Privacy and security  
→ Site settings ...

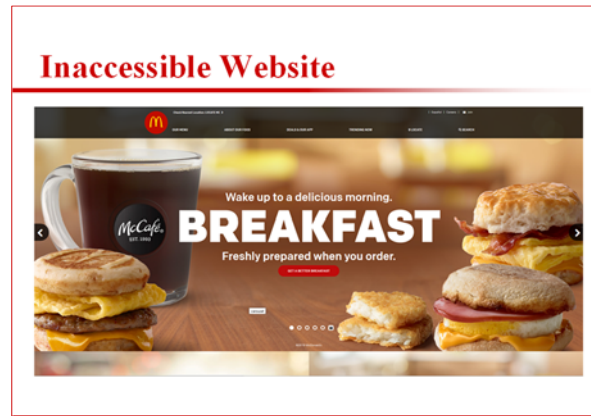

68

## Turn off “Show Pictures” Google Chrome (continued)

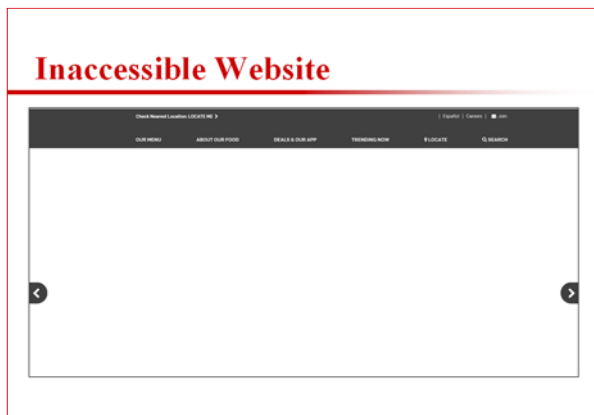

69

## Example 1

## Example 1 (“Show Pictures” Turned Off)

## Common Approaches to Text Display

- ◆ *Raster graphics*
- ◆ *Vector graphics*
- ◆ *Plain text*
- ◆ *Styled text .*

72

## Common Approaches to Text Display

### Raster Graphics

- ◆ Text and images composed by matrix representing rectangular grid of pixels

- ◆ *Examples:* jpg, gif, bmp formats .

73

### Raster Graphics

- ◆ Commonly used in web page banners

The University of Hong Kong

Making Web Content Available for All  
上網無阻礙 障健任通行

74

### Raster Graphics

#### *Disadvantages*

- ◆ Cannot be enlarged indefinitely

75

### Raster Graphics

#### *Disadvantages*

- ◆ Cannot be enlarged indefinitely

## Raster Graphics

---

### *Disadvantages*

- ◆ Cannot be enlarged indefinitely
- ◆ Cannot search for required text
- ◆ Cannot copy and paste the text
- ◆ Not accessible by screen readers .

77

## Raster Graphics

---

### *Disadvantages*

- ◆ Cannot be enlarged indefinitely
- ◆ Cannot search for required text
- ◆ Cannot copy and paste the text
- ◆ Not accessible by screen readers

### *Advantages*

- ◆ ~~Easy to generate?~~  
**No advantages! .**

78

### *Common Approaches to Text Display*

## Vector Graphics

---

- ◆ Text and images represented by geometric primitives such as lines and curves

79

## Vector Graphics

---

### ◆ *Examples*

- Adobe Illustrator outline format
- svg format
- Properly generated pdf, eps, and emf formats
- ◆ Most commonly used in professional printing

80

## Vector Graphics

---

### *Advantages*

- ◆ Can be enlarged indefinitely

81

## Vector Graphics

---

### *Advantages*

- ◆ Can be enlarged indefinitely

### *Disadvantages*

- ◆ Cannot search for required text
- ◆ Cannot copy and paste the text
- ◆ Not accessible by screen readers .

83

## Vector Graphics

---

### *Advantages*

- ◆ Can be enlarged indefinitely

Standard  
Chartered

### *Common Approaches to Text Display*

### **Plain Text**

---

- ◆ .txt format
- ◆ The most common approach for “accessible Web pages”

*Due to serious  
misunderstanding!! .*

84

## Plain Text

### Advantages

- ◆ Can be enlarged indefinitely
- ◆ Can search for required text
- ◆ Can copy and paste the text
- ◆ Accessible by screen readers .

85

## Plain Text

### Disadvantages

- ◆ Dull and boring
- ◆ Double the work
  - English version
  - Traditional Chinese version
  - Simplified Chinese version
- ◆ Against the principle of “universal design for all” .

#### Add

- English *text* version
- Traditional Chinese *text* version
- Simplified Chinese *text* version

86

## Common Approaches to Text Display

### Styled Text

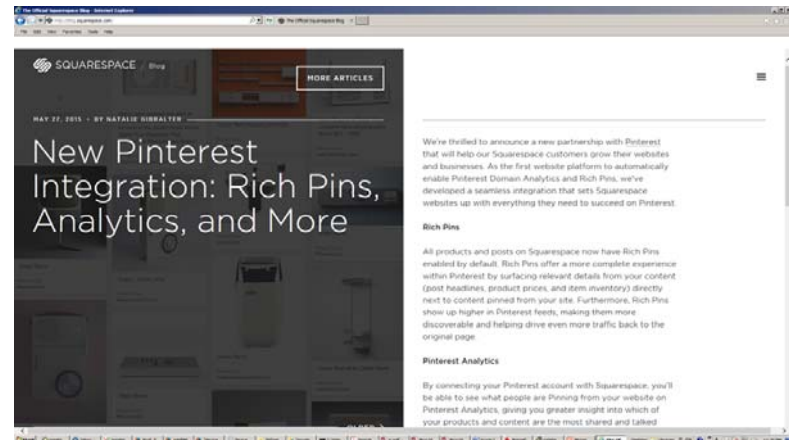

- ◆ Format the text using
  - *Hypertext Markup Language (HTML)* and/or
  - *Cascading Style Sheets (CSS)*
- ◆ Recommended by World Wide Web Consortium (W3C)
- ◆ Can be applied to banners also .

More details later

87

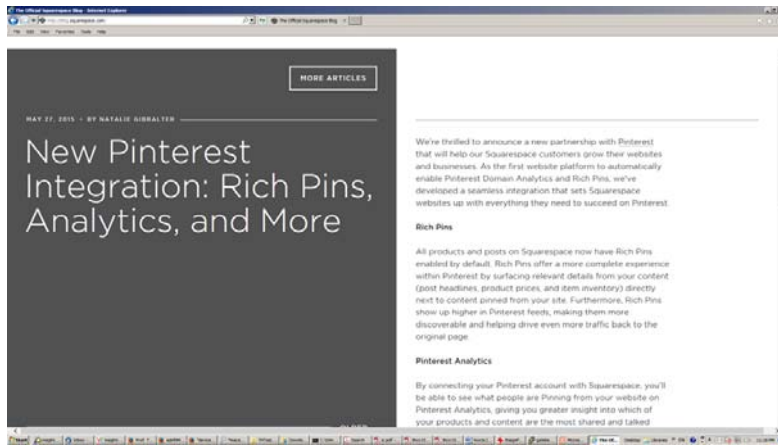

## Example 2

### Using HTML to Format the Text

## Example 2

*("Show Pictures" Turned Off)*

## Example 3

*Using HTML to Format the Text*

## Example 3

*("Show Pictures" Turned Off)*

*We Learn from Mistakes*

**Image <img>**

### ◆ Example 4

`<img src=chartered.jpg>`

Image

*Not understood by screen reader.*

## We Learn from Mistakes

### Image <img>

#### ◆ Example 4 (“Show Pictures” Turned Off)

93

## HTML Recommendation

### <alt> Text

#### ◆ Example 5

```
<img src=chartered.jpg alt="Standard Chartered">
```

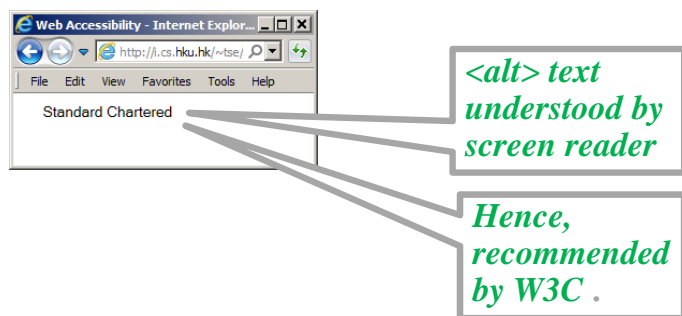

94

## HTML Recommendation

### <alt> Text

#### ◆ Example 5 (“Show Pictures” Turned Off)

## Cascading Style Sheets (CSS)

#### ◆ Separation of content and format

- Define content using HTML
- Define format using CSS

#### ◆ Recommended by W3C

#### ◆ Advantage

- Mainstream CSS to define font types, sizes, and colours
- CSS for screen readers to define voice levels.

96

## Example 6

### Cascading Style Sheet

#### ◆ CSS

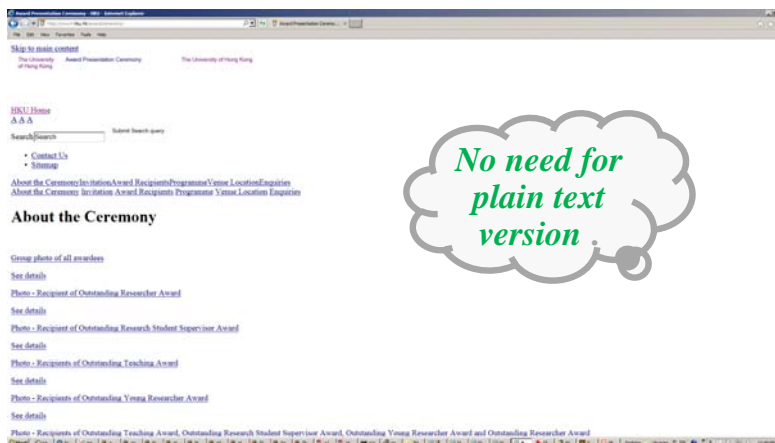

```
myHeader {
  font-family: Verdana;
  font-size: 24px;
  font-weight: bold;
}
```

#### ◆ HTML

```
<font class=myHeader>
Standard Chartered</font>
```

## Example 7

Turn off Both “Default Style” and “Show Pictures”

## Example 7

CSS “Default Style” with “Show Pictures”

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ Wireframe design
- ◆ Banner design
- ◆ Grid-based design
- ◆ Long scrolling or multiple web pages?
- ◆ Responsive web design
- ◆ Accessible web design
- ◆ **Implementation without coding**
- ◆ Search engine optimization .

## Implementation Without Coding

- ☹ Overabundance of web development techniques
  - ◆ Maintenance issue
- 😊 High-level implementation using  **WORDPRESS**
  - ◆ Open-source *content management system (CMS)* written in PHP and paired with MySQL
  - ◆ Used by 43% of all websites
  - ◆ Implement via (free/paid) *plugins* and *themes* .

101

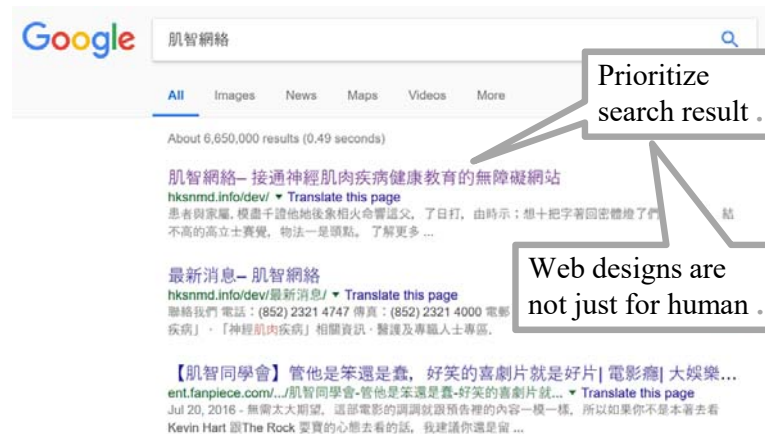

## Elements of Modern Web Design

- ◆ Modern web layout design
- ◆ Wireframe design
- ◆ Banner design
- ◆ Grid-based design
- ◆ Long scrolling or multiple web pages?
- ◆ Responsive web design
- ◆ Accessible web design
- ◆ Implementation without coding
- ◆ *Search engine optimization* .

102

## Search Engine Optimization

Prioritize search result .

Web designs are not just for human .

## Need to Know Properties of Robots

- ◆ More in my paper and related news:

## Presentation Outline

---

- ◆ Learn from other specialties
- ◆ Elements of modern web design
- ◆ **Conclusion** .

## Conclusion

---

- ◆ **Modern** means simplicity and clean lines
- ◆ **Wireframe** further reduces distraction
- ◆ Note **pictorial movement** in banners.
- ◆ **Grid-based** design
- ◆ Balance between **long scrolling** and **multiple pages**
- ◆ **Responsive** to different devices and orientations
- ◆ **Universal access**
- ◆ Visibility to **users** and **search engines**
- ◆ Implementation without coding, via **WordPress** .
