

# BEng in Computer Science

# What is Computer Science?

Computer science is not just about programming and studying the computers, but rather it is about **problem solving** – the study of algorithms and information representation to solve reallife problems.

"Almost every major challenge facing our world is <u>turning to computing for a solution</u>, from conquering disease to eliminating hunger, from improving education to protecting the environment." by Prof. Eric Roberts of Stanford University, the co-Chair of ACM's Education Board at 2007
