

About the Cover Design

- ◆ We focus on the minimalist, elegance, and grid-based aspects of modern graphic design.
- ◆ The cover attracts readers to the red, broken “Fault” and the mouse pointer that portrays “Localization”.
- ◆ We have chosen the “Impact” font, which allows the book title and list of authors to be fully legible even when displayed as small photos on laptop computers or mobile devices.
- ◆ The whole design is meant to be striking and attractive, so that readers may notice the cover among various book images shown in the website of Wiley-IEEE Press or Amazon.
